WHY THIS FIRST SALON DEDICATED TO THE ORGANIC WINEMAKERS OF THE JURA ?

In France, only 3% of the vineyard are organic.

In Franche-Comté (the region where the area of the Jura is), 240 ha, i.e. 13% of the Jura vineyard are grown in an organic fashion.

- ✧ These statistics show a huge national increase of organic wine production and above all a strong motivation in our region.
- ✧ The success of national events and salons paved the way for regional salons because of the sensitivity of organic consumers. They want to go back to the roots of local productions.
- ✧ For these reasons, it appears as a crucial issue to create a regional dynamic to promote and sell organic wines from the Jura.

All the organic domaines and all the domaines in conversion from the Jura and the Franche-Comte are invited to participate.
So far, 24 domaines have registered to participate.

WHAT REQUIREMENTS DO ORGANIC WINEMAKERS HAVE TO COMPLY WITH IN ORDER TO TAKE PART IN THIS SALON?

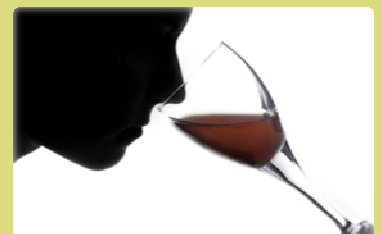

Winemakers have to :

- be at least in the first year of the organic conversion. In this case, they are only allowed to display wines from this first year and not wines from the previous years.
- be members of the departmental organic union, which supports the organization of the Salon.
- run a fully certified organic juridical entity.
- show the certificate testifying that their production is organic.

« LE NEZ DANS LE VERT » - « THE NOSE IN THE GREEN » ?

The name of the Salon is a pun with the word "verre" meaning "glass" and the word "vert" meaning "green".

It's the symbol of alternative farming methods that preserve the environment and the taste identity of the wine.
